

Programa Autodesk Inventor Simulation

Capitolul 1: Introduction to Engineering Analysis

- Lectia 1: Stress Analysis Overview
- Lectia 2: Dynamic Simulation Overview

Capitolul 2: Stress Analysis

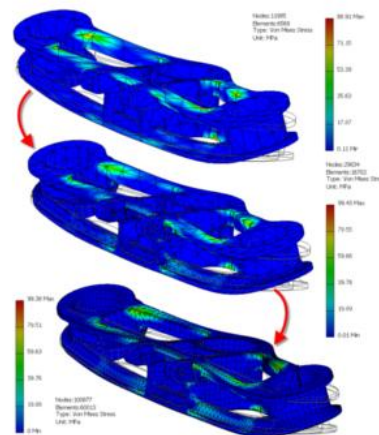

- Lectia 1: Preparing and Running a Simulation
- Lectia 2: Viewing Reports
- Lectia 3: Analyzing Assemblies
- Lectia 4: Performing a Parametric Design Study
- Lectia 5: Mesh Control and Convergence
- Lectia 6: Performing a Modal Analysis

Capitolul 3: Dynamic Simulation

- Lectia 1: Creating Joints
- Lectia 2: Defining Loads and Joint Properties
- Lectia 3: Running Simulations and Analyzing Results
- Lectia 4: Building Nonredundant Models
- Lectia 5: Sharing Dynamic Simulation Results with Stress

Capitolul 4: Engineering Problems and Solutions

- Lectia 1: Solving Design Problems

Programa Autodesk Moldflow

- Capitolul 1: Introduction to Synergy
- Capitolul 2: Quick Cool-Fill-Pack-Warp Analysis
- Capitolul 3: Analysis Workflow
- Capitolul 4: Model Requirements
- Capitolul 5: Model Translation and Cleanup
- Capitolul 6: Gate Placement
- Capitolul 7: Molding Window Analysis
- Capitolul 8: Results Interpretation
- Capitolul 9: Gate & Runner Design
- Capitolul 10: Basic Packing
- Capitolul 11: Flow Analysis Process Settings
- Capitolul 12: Autodesk Moldflow Communicator
- Capitolul 13: Guided Project
