Contents

Copyright 2
Conventions Used in this Guide 6
Recommended Operating Systems and Hardware for Edgecam 7
Supported Operating Systems 7
Minimum Specifications 8
- Pre-Requisites 10
- Licensing Requirements 10
- Before you Start 10
- Overview of the Lesson 11

What is Edgecam Solid Machinist? 12
- Datum Position 13
- Translate 13
- Rotate 14
- Scale 14

Exercise 1 – Transforming Solid Parts 15
Align Body for Milling Command 22
Exercise 2 - Align Body for Milling 23
Exercise 3 - Align For Milling- Dynamic Translating 25
Preparing Solid Models for Manufacture 29
- Feature Types (AFR) 29
- The Features Window 30
- Feature Find – Auto component selection 31
- Feature Capping 33
- Holes 33
- Find Radial 34
- Find All Holes 34
- Mill 34
- Nesting 35
- Open Pocket 35
- Open Mill 36
- Flat Face Features 36

Exercise 4 –Using the Feature Finder 37
Exercise 5- Advanced Feature Finder 41
Manual Feature Finding 44
Exercise 6 – Manual Feature Finding 45
Exercise 7 – Prepare Solid for Machining 47
Creating Stock 48
- Automatic Stock 49
- Digitise 49
- Stock 50

Exercise 8 - Creating Fixturing 53
Machining Solids Using Features 55
- Introduction 55
- Switching to Manufacture Mode 55

Exercise 9 – Manufacturing Environment 56
Exercise 10 – Defining Fixtures 60
Creating CAM Instructions 62
- Manual 62
- Manually Created Machining Instructions 63

Automatic 63
Automatically Created Machining Instructions 64
Machining Process for Packing Adaptor Component 64
Exercise 11 – Creating a Face Mill within the ToolStore 65
Edgecam ToolStore 65
Machining in Edgecam 68
Operation Preferences 68
Exercise 12 – Face Milling 69
Viewing the Toolpath in Edgecam 73
Editing 75
Exercise 13 – Editing the Face Milling Operation 75
Exercise 14 – Roughing Operation 77
Viewing the Operation 83
The Roughing Cycle 85
The General Tab 85
Stock Type 87
More… Tab 89
Using Containment Boundaries in the Roughing Cycle 89
Boundary Control 89
Depth Tab 89
Contouring Tab 90
Approach Tab 90
Approach Types: 91
Approach Moves, Order of Preference 91
Exercise 15 – Viewing the Toolpaths 92
Exercise 16 – Flat Land Finishing 93
Exercise 17 – Profiling Operation 99
Exercise 18 – Drilling Cycle 103
Manipulating Machining Instructions 110
Moving/Copying/Inserting a Machining Instruction 110
Inserting a CAM Instruction 110
Trainee Notes 111
Exercise 19 – Generating the CNC Program 112
Edgecam Simulator 114
About Simulate Machining 114
About Rapid Result 114
Changing Playback Speed 115
Pausing the Simulator 115
Output Window 116
Collision Detection 116
Machine Simulation and Graphics 117
Using STL Files 117
Using the STL File Model 117
Waste Stock Removal 117
Recording AVI's 118
Associative Reloading of Solids 119
Reloading Manually 119
Automatic Reloading 120
Reload Preferences 120
Exercise 20 – Reloading a Modified Solid 121
Trainee Notes 124

Machining With Boundaries 125
Extracting Geometry from a Solid 125
Geometry from Edges 125
Geometry from Loops 125
Geometry from Vertices 125
Creating Features for Machining Boundaries 126
Exercise 21– Creating a Containment Boundary 127
Exercise 22 – 3D Machining with Profiling Cycle 132
General Tab 134
Depth Tab 135
Helical 135
The Control Tab 136
Finish Shallow Area 136
Start/End Tab 136
Profile Extensions (Start/End tab) 136
Solid Machinist Associativity 142
Exercise 23 – Toolpath Associativity 142
3D Machining and Feature Capping 145
Exercise 24 – Using Feature Caps When 3D Machining 145
Document Revision Control 153
